

## Dual Pump AC & Battery Back-Up Pump System Model PZM-STORMPRO-55

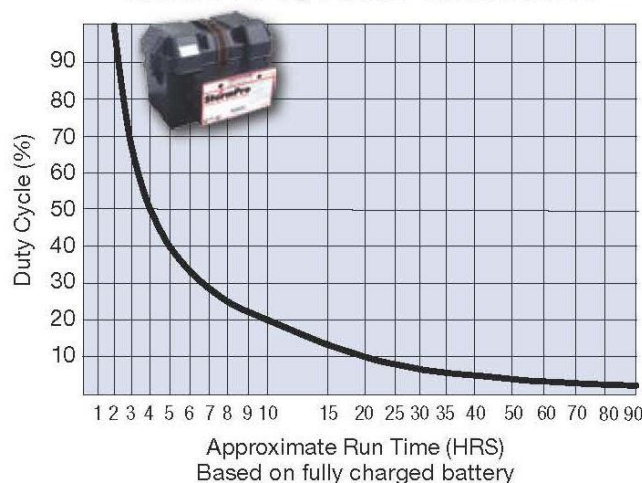

### Package Includes:

(2) Heavy Duty, 1/3 HP, EnergyPro Sump Pumps,  
ULTRA NATOR Control & Alarm System, Vertical Style  
Pump Switch, Vertical Style Reed Override / Alarm Switch,  
StormPro AC/DC Converter and Sealed Maintenance Free  
Battery

### Features

- Works as both a primary and 12V, battery back-up system
- The 1/3 HP, EnergyPro pumps runs on either AC or DC power
- 50 GPM / 3000 GPH @ 10' TDH
- The StormPro back-up system utilizes two reliable, heavy duty, 1/3 HP, 120V AC pumps. Unlike most systems that rely on one small, plastic bilge-type DC pump
- ULTRA NATOR control will cycle each pump as needed; if one pump fails, the other pump will take over and an alarm will sound. The ULTRA NATOR has a built-in high water alarm and is capable of connecting to your home security system or dialer.
- Fully automatic, converts 12V battery power into standard 120V electricity to run the 1/3 HP, EnergyPro sump pump when power is out. And runs off of standard 120V electricity when the power is on.
- The 1/3 HP EnergyPro pump is extremely efficient, drawing only 4.5 amps. Providing a longer run time while pumping more water than most 1/2 HP pumps.
- The system included a 130 amp hour, heavy duty, sealed, maintenance free battery.
- 2 year limited warranty
